

Quality Engineering and Design of Experiments, Spring 2017

Homework #7

Due: 2017/06/08, 12:00

1. (30 pts) In this assignment, you have to present the problem that will be solved in your final project. The contents that must be in this proposal include: (1) problem description; (2) quality characteristics; (3) ideal function; (4) control factors; (5) levels of control factors; (6) orthogonal array to be used. You will have to give a 5-to-8-minute presentation in the class. I will collect your presentation slides right after the class.
